6" "KEEN" (A.C.) ELECTRIC BENCH GRINDER.
No. 400.

This addition to our line is for the quick grinding of Tools, etc. It is Ball Bearings, robustly built to give long trouble-free service.

**THIS MACHINE COMPLIES WITH THE NEW
FACTORY REGULATIONS.**

We Don't Meet Competition—We MAKE It.

MOTOR. Single Phase $\frac{1}{2}$ h.p. totally enclosed with dust proof Ball Bearings, which do not need lubrication for a period of two years as a special reservoir is provided. All windings are very heavily impregnated with insulating varnish and are tested to withstand 2,000 volts. This Motor is of constant speed type, 2,800 r.p.m. approx.

SWITCH. Special slow break and quick make.

TOOL REST. Fully adjustable.

GRINDING WHEELS. Two fitted of best quality Vitrified Bond one (6" x 1" Dimon Grit Coarse). (One 6" x 1" Dimon Grit Fine).

WHEEL GUARDS. Comply with H.O. regulations and have an adjustable rotary movement.

The Machine is complete with length of cab tyre flex with earth lead switch enclosed in body, the whole machine being handsomely finished in an attractive blue stove enamel.

NOTE.

The Motor is very efficient, taking only approx. 300 watts on full load and will soon pay for itself. It is also built to B.S.S. 170/1926 standards and fully guaranteed for one year, as is also complete machine. Motor can be run from any lighting circuit which is nearly always single phase. 200—240 A.C.
